Projects

Nova AI Personal Assistant
(Self-Hosted Automation System — Local HomeLab Project)

- Built a self-hosted AI system that automates and monitors tasks, schoolwork, and schedules through Notion and Google Calendar integrations.
- Designed for full **local storage and security**, managed entirely within a HomeLab environment.

TikTok AI Content Agent
(Automated Social Media System — Python, API Integration)

- Developed an **AI-powered automation system** that generates, captions, and auto-posts TikTok videos using API-based workflows and scheduling scripts.
- Designed natural language generation for **dynamic descriptions and hashtags** optimized for engagement.
- Grew a TikTok page from **0 to 11,200+ followers in under 3 months**, leveraging data-driven content optimization.
